INK DISSOLVER

PROPER USE WILL

Reduce Down
Time & Increase
Production Output

Time & Effort

Lengthen the Life
of the Anilox Rolls
& Printing Plates

Prevent Clogged
Pumps, Drains,
Hoses & Ink Pits

SPECIFICALLY DESIGNED FOR AQ AND UV INKS.

VioClean™ is a non-caustic, alkaline dissolver for flexographic inks, plates, press washing and anilox rolls. It has a unique blend of surfactants and pH builders to dissolve ink on contact and prevents re-deposition of the inks. VioClean is Low VOC, non-hazardous and ideal for packaging facilities in need of a green solution.

VioClean is designed to conveniently pump through the entire press system to prevent ink clogging in the pumps and anilox cells. As it is pumped through the press, it will penetrate deep down into the anilox cell up to 1200 line screen, rewet dried ink and suspend it so it will not re-deposit during the cleaning process.

- Contains NO Caustic – Safe on Aluminum, Teflon, Photopolymer, Ceramic, Chrome, Brass & Copper
- Exclusive Emulsification Technology that Prevents the Re-Deposition of Ink in Anilox Cells & Presses
- Highly Concentrated – Non Flammable – Non Caustic
- VioClean is Press Ready – Nothing to Add or Dilute
